

ONE DAY WORKSHOP AGENDA

PROMPT ENGINEERING FOUNDATIONS TO DEPLOYMENT

About the Program:

This intensive 1-day workshop is designed to give participants a rapid yet comprehensive foundation in Prompt Engineering, the core skill needed to effectively use Large Language Models (LLMs) like GPT, Claude, and Gemini. It combines foundational theory with hands-on projects to transform beginners into capable prompt designers, content automators, and AI tool builders — all without writing complex code. Participants will explore how to craft effective prompts, fine-tune responses, and apply AI to real-world use cases including resume summarization, data-to-text generation, and SQL automation. By the end of the day, attendees will have built and deployed a fully functional GenAI mini- app using Streamlet or Google Colab.

Workshop Objectives:

- Understand the fundamentals of Generative AI and LLMs
- Master prompt structuring: instructions, variables, examples
- Tune LLM parameters for better control and accuracy
- Build and deploy a mini AI application using prompt logic

Tool & Programming Languages:

1-DAY PROMPT ENGINEERING FOUNDATIONS TO DEPLOYMENT

SESSION	TIME	TOPIC
1	09:00 – 10:30 AM	Foundations of Prompt Engineering: Topics: ➤ Introduction to Generative AI & LLMs (GPT, Claude, Gemini) ➤ Use Cases in Content, Code, Support, and Analysis ➤ Prompt Structure: Instructions, Context, Variables ➤ Key LLM Parameters: Temperature, Top-p, Tokens ➤ Zero-shot, Few-shot, and Chain-of-Thought prompting
		Hands-on: ➤ Create a simple Q&A or Rewriting prompt using Colab
	10:45 – 12:15 PM	Functional Prompting Projects: Topics: ➤ System & Role-based Prompts (Persona Design) ➤ Prompt Debugging Techniques for Consistency ➤ Evaluation Techniques (Human + Metrics overview)
		Mini Projects: ➤ Resume Summarizer + Keyword Extractor ➤ Email Classifier using Prompt Logic
		Hands-on: ➤ Use Colab to test and debug prompts with structured input
	12:15– 1:00 PM	Lunch Break:
3	1:00– 2:30 PM	Creative & Automation Prompts: Topics: ➤ Data-to-Text Generator (CSV → Summary) ➤ Natural Language → SQL Generator ➤ Text Rewriter (Formal/Informal) ➤ Bias Detection & Cleaner
		Hands-on: ➤ Build a Flashcard Generator or Workout Plan Generator with input variations
4	2:45 – 4:30 PM	Topics: ➤ OpenAI API Basics (Key, Limits, Pricing) ➤ Streamlit or Colab UI for Prompt Apps ➤ LangChain Basics (if time allows)

		Mini Project: ➤ Build a Prompt Rewriter App or AI Resume Assistant (Deploy with basic UI using Streamlit) Wrap-up: ➤ Demos & Feedback ➤ Q&A
